### FOR IMMEDIATE RELEASE

---

#### NEW STRIEBIG CONTROL VERTICAL PANEL SAW FROM COLONIAL SAW The Best in Vertical Panel Saws Just Keeps Getting Better

Kingston, MA – April 2010 – Colonial Saw is proud to announce the addition of a new Swiss-made STRIEBIG Control—the top-of-the-line automatic traveling vertical panel saw—to its product offerings. Nearly all of the Control’s automatic features are controlled on the new *touch screen* color display panel. Multiple horizontal rip cuts can be executed with the new optional EPS.Y system. Upload cut lists via USB Memory Stick. Automatic travel features include:

- ❑ Automatic saw travel with variable feed rate
- ❑ Panel end sensor for faster cycling
- ❑ Start position memory for optimum efficiency
- ❑ Return mode selector switch

Convenient, sturdy mid-shelf allows for comfortable working of small parts and the ability to stage material on one side of the saw. The auto-shifting, full wood-backing grid, digital measuring with fine adjustment for both X and Y axes, along with a new laser light to help guide set-up of horizontal cut position are just some of the many standard features offered in the new-styled Control. Watch a video of the new STRIEBIG Control at: [http://www.csaw.com/STRIEBIG\\_New\\_Styled\\_Control.wmv](http://www.csaw.com/STRIEBIG_New_Styled_Control.wmv).

**Colonial Saw, Inc.** is North America’s importer of Swiss made STRIEBIG Vertical Panel Saws, LAMELLO specialty tools, biscuits and biscuit joiners, and the world’s finest grinding machinery. For over half a century, the company has delivered uncompromising performance and value, along with one of the most comprehensive and responsive after-sale customer support programs in the industry.
