

Ceiling Beam Assembly with P-System

“What makes the Lamello P-System great for us isn’t just the efficiency – it’s inspired our guys to think outside of the box. It’s a bulletproof way to get things done fast and effectively, and I will continue to use this great system from here on out.”

Scott Babineau, Sweenor Builders- Wakefield, RI

How it works:

1. Lay out center lines for connectors on facias and soffit

2. Set Zeta P2 to "14" for the P-14 connectors

3. Set flip stop to desired angle and use the spacer plate if necessary. *Or use stop square for long point referencing

4. Machine P-System Slots

5. Using drill jig, drill 6mm wrench access hole for Clamex connectors (not required with Tenso)

6. Install connectors

7. Assemble and clamp Clamex connectors with allen wrench tool

8. Pre-assemble as complete "U"- or partial "L"- shapes

9. Scribe to ceiling and install
